

DUSIT MUANGMEE

Full-Stack Developer

Phichit 66140 Thailand | E-mail : babe.dusit@gmail.com | Mobile : 0642488042

PROFESSIONAL SUMMARY

Passionate and project-driven Computer Engineering student with a solid technical foundation in full-stack software and web application development, along with internship experience in developing IoT and PDU monitoring systems. Demonstrated capacity to design interactive platforms and manage database integrations while handling complex technical constraints in a fast-paced environment. Seeking a Full-Stack Developer opportunity to begin a career in software engineering, where I can contribute my skills, knowledge, and experience to efficiently support the organization's technological growth.

CORE COMPETENCIES

- Full-Stack Web Development
- IoT System Integration
- API Design & Development
- Database Architecture & Management
- System Monitoring & Analytics
- Interactive UI Implementation

EDUCATION

BACHELOR OF ENGINEERING – COMPUTER ENGINEERING

2022 – 2025

University of Phayao / GPAX 2.70

WORK EXPERIENCE

LANNACOM CO., LTD.

NOV 2025 – FEB 2026

Network & System Engineer Intern

- Installed and configured Fortinet firewall devices, including basic network and security policy setup
- Assisted in Maintenance Agreement (MA) tasks for CCTV systems, including camera inspection, system health checks, and basic troubleshooting
- Supported troubleshooting for CCTV network connectivity and recording systems
- Developed a web-based monitoring system for Power Distribution Units (PDU)
- Displayed device status and power usage data
- Integrated SNMP data for monitoring and management
- Improved visibility and efficiency in managing power infrastructure

SELECTED PROJECTS

AUG 2025

Full-Stack Software & IoT Applications

- Developed full-stack applications, including a remote IoT smart plug controller and a real-time social media platform.
- Designed secure, scalable databases to manage user authentication, device states, and usage logs efficiently.
- Built responsive web and mobile UIs to ensure seamless hardware-software integration and optimal user experience.

RELEVANT SKILLS

Language: Thai (Native) / English (Pre-Intermediate)
Programming: JavaScript, HTML/CSS, SQL, C++
Web Frameworks: React.js, Node.js, Express
Database & Tools: MySQL, Docker
Other Tech: IoT Integration, Network Configuration, Figma
